Graduate to Premium Protection with Kaspersky

Schools and the Internet have become increasingly intertwined. Because schools work in more open environments and have assets that are very attractive to hackers, school IT systems are increasingly targeted by cybercriminals looking for their next victims. Documented cases of school funds being drained by cybercriminals continue to be reported. School districts must be vigilant about protecting their faculty, students, and systems from cybercriminals who see our educational institutions as a breeding ground for malware.

Protect, perform, manage and deploy in a snap with Kaspersky Lab!

Easy Implementation and Management across the entire School District

- Automatically discover systems, remove incompatible software, and deploy Kaspersky across multiple locations and remote offices
- Wizard-driven administration scenarios simplify administrative tasks
- Best practice policies are built into the installation so that you are protected immediately
- Only one restart following installation
- Customizable user experience allows for restricting access to or hiding the Kaspersky application so that students cannot change security policies or disable system protection
- Active directory integration for simple and easy group policy deployment and management
- Policy structures that allow more flexible configuration
- Small footprint and low system utilization means great performance and longer lifecycles for aging PCs
- Broad and flexible reporting options

Protection for Mobile Systems and Data

- “Location Aware” profiles apply more stringent protection for laptops and netbooks when they leave the protection of the perimeter
- Redirects update requests so that mobile systems get the latest updates while outside the network
- Device control protects systems from malware that may be propagated by USB, CD and DVD media. Blocks Auto-run Applications to prevent potential malware from running without the user’s knowledge

And much more! **Switch today and enjoy Premium Protection, Powerful Performance, and Superior Management.**
